MAESTRO ANTONIO VARGAS

....the energy behind a generation of creativity and innovation

His generosity as a teacher knows no boundaries. Antonio, a true communicator and mentor, does not hold back when he teaches. He treats all students with the same respect he affords a professional and the materials he teaches in the beginners class can be used by the students if and when they start performing in public. ❖ When he teaches, the studio becomes a temple, and the religion is Flamenco ❖

In addition, Antonio Vargas has remarkably devised a novel way for notation of Flamenco choreography! The transcriptions are based on symbols representing the Flamenco vocabulary, which translates to footwork. The notations are written down based on musical structures to give the reader the exact timing of the steps in compas. A complete choreography can be written down and preserved in this way, with an exact relationship to the cante as well as the guitar accompaniment. This rare educational opportunity is a must for flamenco educators, students and aficionados.
